

CCMS DATA EXCHANGE DATA SHEET

ADMINISTRATIVE OFFICE OF THE COURTS

INFORMATION SERVICES DIVISION

Court Receives Warrant Proof of Service Notification (ISS804)

Exchange Description

A trial court uses this NIEM-based data exchange to receive a warrant proof of service (POS) notification from an integration partner to update the warrant's status to "Served" when a defendant is arrested on an active warrant.

The notification message sent by the integration partner to the trial court contains warrant proof of service (POS) information (e.g., warrant control number, date served, served by).

No response message is sent by the trial court upon successful receipt of the notification message. Successful delivery of the notification message is assumed unless an error in delivery or processing by the trial court occurs.

Business Response Exchanges

The business response refers to any subsequent exchanges that may occur as a direct result of this exchange, as follows:

- There is no business response to this exchange.

Error Handling

If the trial court does not successfully receive and process the incoming notification message, the integration partner will receive an error message with an error code and error reason.

PROBABLE INTERESTED INTEGRATION PARTNERS

- Law enforcement agency
- County sheriff

RELATED EXCHANGES

Related data exchanges are any preceding or subsequent data exchanges that may be used by an integration partner as part of the overall business process related to this exchange.
